

NEW NORDIC INTRODUCING:

PINASTEROL[®] OPC40

Landes de Gascogne Forest

EXTRACT DESCRIPTION:

- *Pinus pinaster* Premium French Organic Pine Bark dry extract with 40% OPCs (Based on DMAC analysis, Procyanidin A2 equivalent; Vs 52% for PYCNOGENOL)
- Total polyphenol content: 88%
- OPC Purity: Completely and instantly soluble in water.
- Based on the selection of larger-caliber pine barks from French Landes de Gascogne Forest as raw material, corresponding to the oldest pines, far richer in polyphenols. No fibers or bark waste and dust.
- 100% French traceability (Sustainable organic sourcing and production)
- A transparent extraction process in France using only ethanol green solvent and freeze drying for a higher quality preservation of the extract. No ethyl acetate (or chloroform) purification dedicated to OPC selective extraction. (Unlike other renowned pine bark extracts on the market). Therefore, PINASTEROL promotes a greater diversity of active ingredients for a higher synergistic efficacy of all the active ingredients of the French Landes Forest pine bark.
- Besides OPCs, a provided complementary analysis of other polyphenolic compounds like Taxifolin, Caffeic acids or Ferulic acids.
- A fair selling price.
- Available for dietary supplements, cosmetic formulations and functional beverages.

MARITIME PINE BARK (PINUS PINASTER) TARGETED BENEFICIAL EFFECTS:

- Blood circulation
- Nootropics and cognitive functions
- Etc
- Strong antioxidant
